## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/25/07 has been entered.

### ***Claim Rejections - 35 USC § 112***

2. Claims 21-25, 27, 30, 31, 36-38, 48, and 49 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 36 is vague. The claim should actually depend from claim 21 to have proper antecedent support for "the primary container". Claim 48 fails to recite a primary container.

Claim 38 is vague because the recitation of "the external sensing" lacks antecedent support.

Claim 48 is vague because it is not clear as to where the detector molecule and signal material are located in the claimed sensor device.

Claim 49 is vague because it is not clear as to where the bioactive detector molecule and signal material are located in the claimed sensor device.

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent 5,114,864 discloses an optical sensor with a membrane that separates an interior area from an exterior area.
